

# Strategies and Tactics to Manage Information for University Governance

May 3, 2023

**CUBA**  
Canadian University Boards Association

**ACCAU**

L'Association canadienne des conseils  
d'administration d'universités

# Territorial Acknowledgement

We acknowledge that we are located on Treaty 6 territory, and respect the histories, languages, and cultures of First Nations, Métis, Inuit, and all First Peoples of Canada, whose presence continues to enrich our vibrant community.

Our work takes place on historical and contemporary Indigenous lands, including the territories of Treaty 6, Treaty 7 & Treaty 8 and the homeland of the Metis Nation of Alberta and 9 Metis Settlements. We also acknowledge the many Indigenous communities that have been forged in urban centres across Alberta.

## Session Overview

*University governance teams are constantly **flooded** with information. Despite tight resources, teams are expected to fully grasp record **control**, responding to **compliance** requirements while achieving **fast** information retrieval.*

*This session introduces records management to support board success and how you can kick start the program from the ground up. We will also discuss information governance as a strategic, multi-disciplinary approach that will help elevate university governance.*

# Introductions & Agenda

CUBA Professional Development  
Day  
May 3, 2023

1. RIM Awareness
2. Developing RIM
3. RIM Maturity
4. Discussion

(break)

1. Follow Up
2. Getting to Information Governance

## Speakers

# Records & University Governance

Managing University Records

# University Governance

Processes and practices  
to achieve a mandate

**Accountability**  
**Decision-Making**  
**Reporting & Metrics**

**Jurisdictions**  
**Authority**  
**Culture**

### Strategy

- Set strategy (ongoing and 3–5 year plans) in collaboration with university leadership
- Monitor strategy execution on an ongoing basis

### Governance

- Recruit and hire president, conduct performance assessments, and determine succession and transition
- Conduct governance performance assessments and monitor against agreed objectives

### Financial

- Review and approve annual operating budgets and major capital expenditures
- Conduct oversight over university financial management
- Ensure that the university is conducting effective fundraising and investment activities

### Performance

- Establish key performance indicators (KPIs) to which university leaders will be held accountable
- Provide oversight over university performance on key success factors (eg, teaching, research, medical-center success, student life)

### Risk

- Ensure that the university is in full compliance with all of its legal obligations
- Review audit and investigation plans, monitor outcomes, and provide guidance on course of action
- Develop strategy to respond to crisis situation, set risk-mitigation strategies, communicate risk tolerance, and proactively monitor through risk registry (reputational, financial, legal, operational)

### External relations

- Promote and guide partnerships and external engagement (eg, with local community, other higher education stakeholders)
- Serve as a representative of the university in the community and represent the university's interests with integrity and distinction

## Records Management

Managing evidence of  
business decisions

# Records Management & Operational Effectiveness

Ingredients for effective University Governance

Trust	<b>Reliable historical records</b> <b>Controlled sharing of information</b> <b>Timely access to information</b> <b>Flexibility in approach</b> <b>Reduced duplication</b>
Shared Sense of Purpose	
Understanding Issues at Hand	
Adaptability	
Productivity	

# Records Management Considerations

Stakeholders, ie. who wants to know

Operational Units & Councils

Employees & Students

Government

Public Citizens

Support Networks, ie. who can help

## PARIS: Two Parts

AWARENESS

*What do I need to know?*

PARIS TRAINING

IMPLEMENTATION

*What can I do?*

PARIS FRAMEWORK

# Managing University Records

PARIS Training UAlberta

# Records Fundamentals

We need to know what is a record, and what is not a record.

What can you do to manage records?

## Information / Records Lifecycle

# University Records

The records you rely on now and in the future, to:

- Contribute to institutional reputation and history
- Support or enable ongoing business operations

# Transitory Records

Required only for a limited time :

- To ensure the completion of a routine action, or
- To contribute to the preparation of a subsequent record

**Example: YOUR copy of another department's report that is stored in a central repository**

# Where are Records Found?

Where is the Source  
Of Truth?

What about paper  
Records, and Email?

Alfresco

## Records Management

Managing information is an  
individual responsibility,  
guided by business rules and  
institutional policy.

## University vs Transitory Records

### University Records

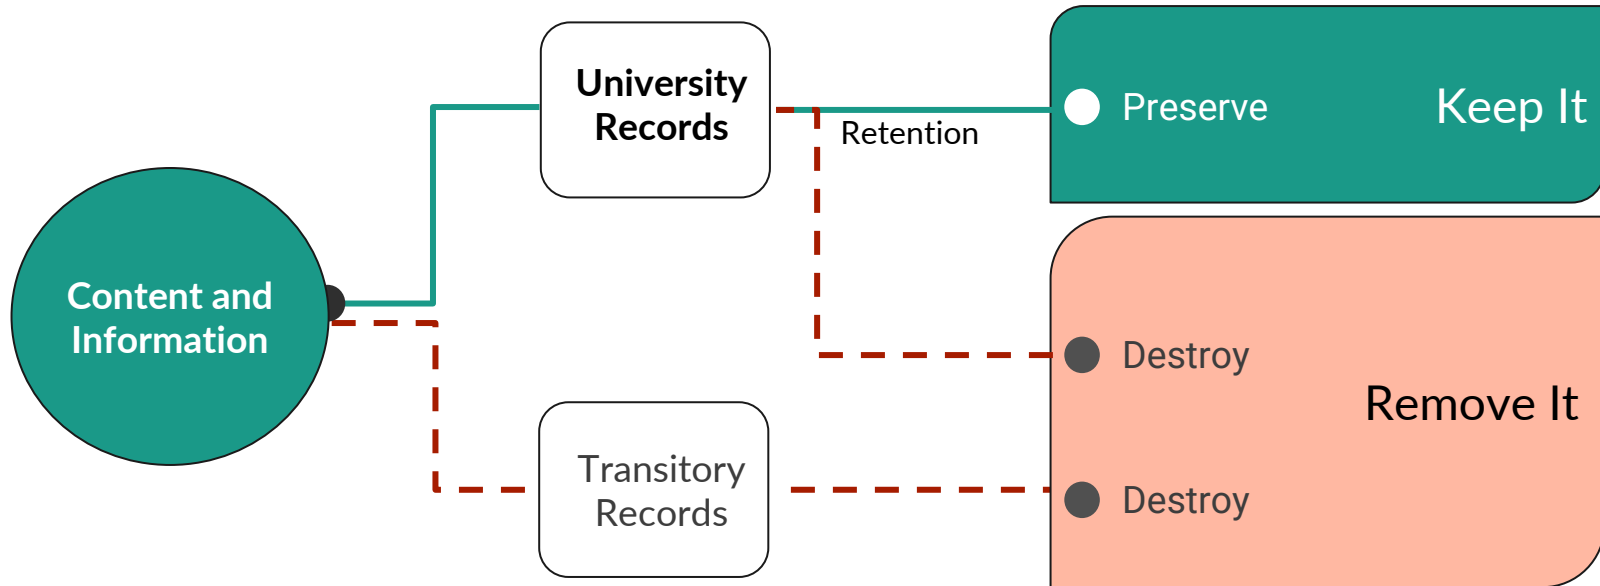

- File / save to official, common repository
- Subject to records retention timeframes

### Transitory Records

- Reference purposes only
- Remove regularly when no longer needed

Records Paradox: hiding in plain sight

## Two Options

---

# Archives and Records of Enduring Value

PARIS Training UAlberta

# Archives

Acquire and make available records of enduring value to the institution

Records are no longer required for current business operations

**Institutional History**  
**Organizational Accountability**  
**Research**

*Plans*  
*Programs*  
*Strategies*  
*Transformations*

# Archival Transfer

Transfer of ownership of records from  
business unit to archives

Chain of custody,  
packing/preparation/delivery

Note: archival records are researchable

# Archival Records - Preservation

Materials are of continuing administrative, legal, or historical value. [Example](#)

**Discover Archives** Browse

This application allows you to search for archival records.

---

# Privacy & Information Access

PARIS Training UAlberta

## Privacy & Information Access

As a public institution, anyone can ask to see your (institution's) records.

Records belong to the institution.

Keep the right records.

## Protecting Privacy (including your own)

**A HELPFUL VENN DIAGRAM**

# Key Points

## RIM Awareness

1. University Records belong to the University.
2. Preserve records that need to be preserved. Remove all others.
3. Protect records from unauthorized use or disclosure.
4. There are many ways to approach managing information effectively. Pick one.

# Part 2: Developing RIM

Building from Within

## Start Now

Protect Records

Cost Savings

Preserve Knowledge

Minimize Risks

Demonstrate Compliance

## Be Specific

You can't solve all records problems all at once

"Our records are in too many places"

"We have so much email"

"We can't find x"

# Developing Business Rules

Managing Content & Information

# Document your own Business Rules / Procedures

Brainstorm and collaborate

60 minutes of documentation

Commit to following business rules

“Our way” rather than “my way”

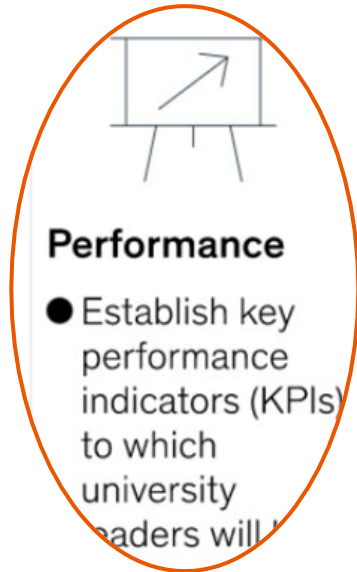

# Recordkeeping

General concept of recordkeeping has remained the same over time

Types of records created, and information use requirements have changed

**Consider: it takes NO effort to keep something.**

# Records Management Responsibilities

Processes

Expectations

Monitoring

At both the individual and unit level

Organization

Roles &  
Responsibilities

Records Retention

Records Disposition

---

# Managing Information When You lack RIM Support

# Why bother?

Separate **information of value** from noise

↑ Findability = ↑ Productivity

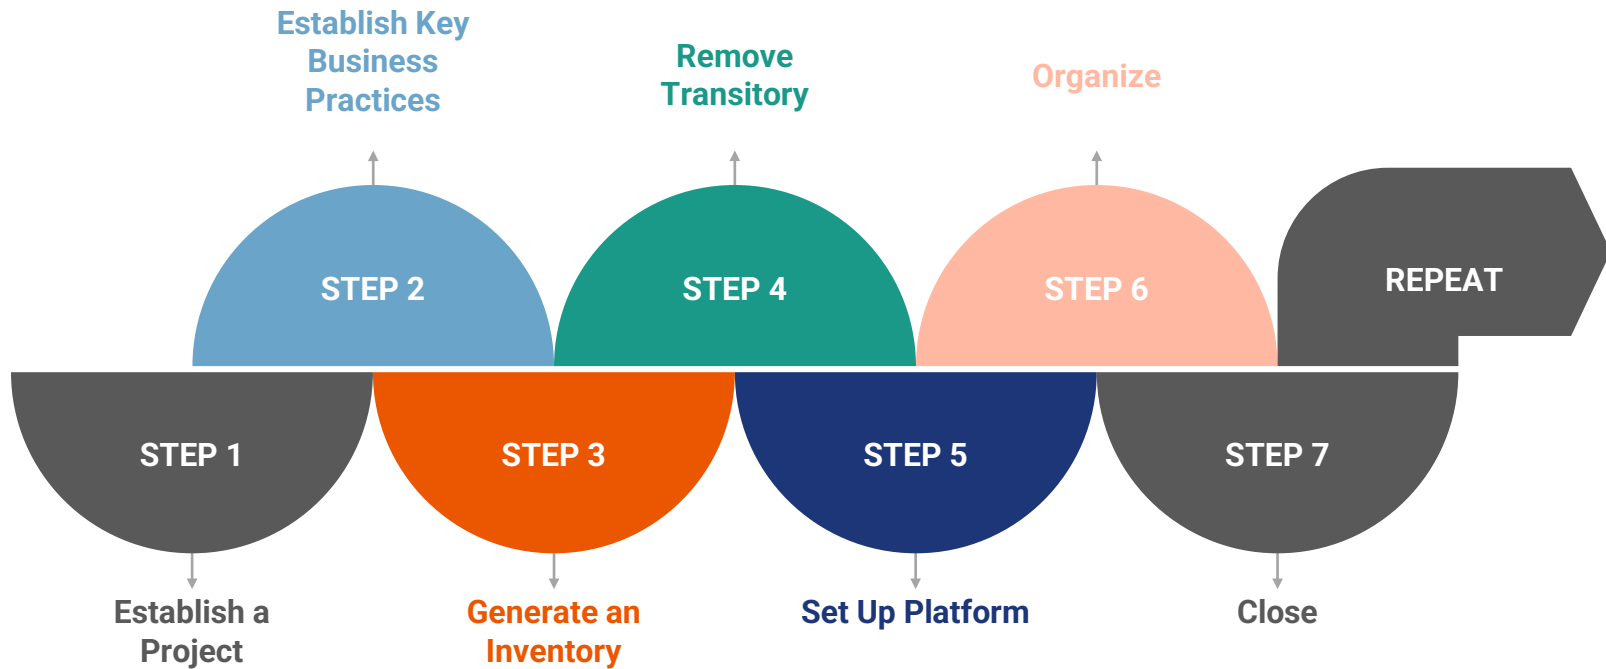

**Insight** to business practice associated with RIM

Create a foundation in building a **RIM program**

Identify what to **automate** = high volume/  
value information type

You can't manage what you don't know

# How-to

## Step 1. Establish a Project

- Purpose
- Roles & responsibilities
- Senior management support
- Stakeholders
- Limit scope! *And define out of scope*
- Constraints and risks
- Timeline
- Change management
- Resource requirements

## Step 2. Examples of Business Rules

**Document management:** file naming conventions, metadata guidance

**Review process** to separate current and expired information

**Repository ownership & use:** what to store and where?

**Access permissions** to manage who to allow CRUD (Create, Read, Update, Delete)

**Monitoring and measuring** mechanism – regular auditing process

# Example: Repository Ownership and Use

Repository	Type	Use	Content Owner	Contact Person
Shared Drive	Various	Expired/archived content required to keep as per the AHS Retention Schedule or the NS business requirement	<i>Insert business and manager responsible</i>	<i>Insert name</i>
Intranet	Org-wide Publishing	Published governance information for access by University staff and those with University network access	<i>Insert business and manager responsible</i>	<i>Insert name</i>
Personal drive / One drive	Personal	For transitory or temporary information only. For personal use	<i>Insert business and manager responsible</i>	<i>Insert name</i>
MS Teams	Collaboration	Project collaboration and documentation	<i>Insert business and manager responsible</i>	<i>Insert name</i>

May need to perform a high-level repository inventory to define repository use

## Step 3. Generate an inventory

### SharePoint

-  **Export as Excel List**  
feature from Document Library
- Ask IT to generate the list using PowerShell
- Use Third-party tool

### Shared Drive

- Ask IT to generate the list using Command Prompt or other means

```
Command Prompt
Microsoft Windows [Version 10.0.19042.1826]
(c) Microsoft Corporation. All rights reserved.

H:\>
H:\>Cd backup

H:\Backup>dir /s > Directory_Inventory_2020-1116.t
```

## Step 4. Remove Transitory

- Refer to your organization's definition of "transitory"
- Depending on policy, may need to "set aside" rather than to delete
- For Shared Drive, create a "Delete" or transitory folder instead of deleting files right away
- Take 15 minutes once a week to delete transitory records
- Once a project is complete, go through transitory records and delete.

## Step 5. Setup Platform

	SHAREPOINT	SHARED DRIVE
Access & permissions	Who approves the key changes Who can make the changes Who can access, Who controls access	
Information architecture	Site and folder hierarchy Limit to 3,4 layers where possible	
File name	File name guideline for consistency	
	File name/path character limit	
Metadata	Limit metadata sets Minimize folder use	
Single source of truth	Use quick links to avoid duplication	Use shortcuts to avoid duplication
Others	Homepage design Document library views Version control	Create transitory folder

# Example File Structure

AD	ADMINISTRATION	FI	FINANCE	GO	GOVERNANCE	HR	HUMAN RESOURCES

IM06	Other Organizations	PA06	Conditional Grants Programs	PR06	Fund Raising	SA06	Students' Council
		PA07	Cost Recovery Programs			SA07	Student Financial
		PA08	ESL Programs			SA08	Student Services
		PA09	Clinical/Practicum Placement			SA09	Surveys/Evaluation
		PA10	Doctoral Programs				
		PA11	International Programs				

## Step 6. Organize 🗂️

Critical & “Active” information first

Correct file name, metadata

Content migration from one repository to another

Do not over-organize!

Keep record of changes in the inventory

## Step 7. Close

Formally close the project

- Metrics reporting
- Acknowledge contributors
- Lessons learned
- Next steps and recommendations

Metrics reporting:

- ROT data (redundant, obsolete, trivial)
- Before and after: file organization, site storage

## More Tips

Involving consultants

Change management

Infographics, job aids

Make people accountable

No file plan but paper inventory exists?

Ask your colleagues

Don't let the scope of a project get you down

Join ARMA

# Key Points

## Developing RIM

This is not a one time fix

You can't manage what you don't know

There are information management projects you can complete without a retention schedule and without spending \$\$

Grow your practice and foundational framework overtime, don't try to do them all.

Do some of these basic items presented today to demonstrate how you can bring value to the organization and help staff improve productivity

Use completed projects to help build your RIM program

# Part 3. RIM Maturity

## RIM Maturity in University Settings

## Consider the following:

- Institutional systems
  - Multiple instances of unit-based systems
  - Unit-specific systems
- 
- Systems, controls, or both?
  - Develop, document, implement, test

## Examples in University Settings

Electronic Document Management System exists but not adopted

RIM policy and retention exists but departments don't know how to apply it

Cross institutional records stored in multiple repositories

Inconsistent RIM practices across departments or faculties

Academics, faculties regard university records as as their own

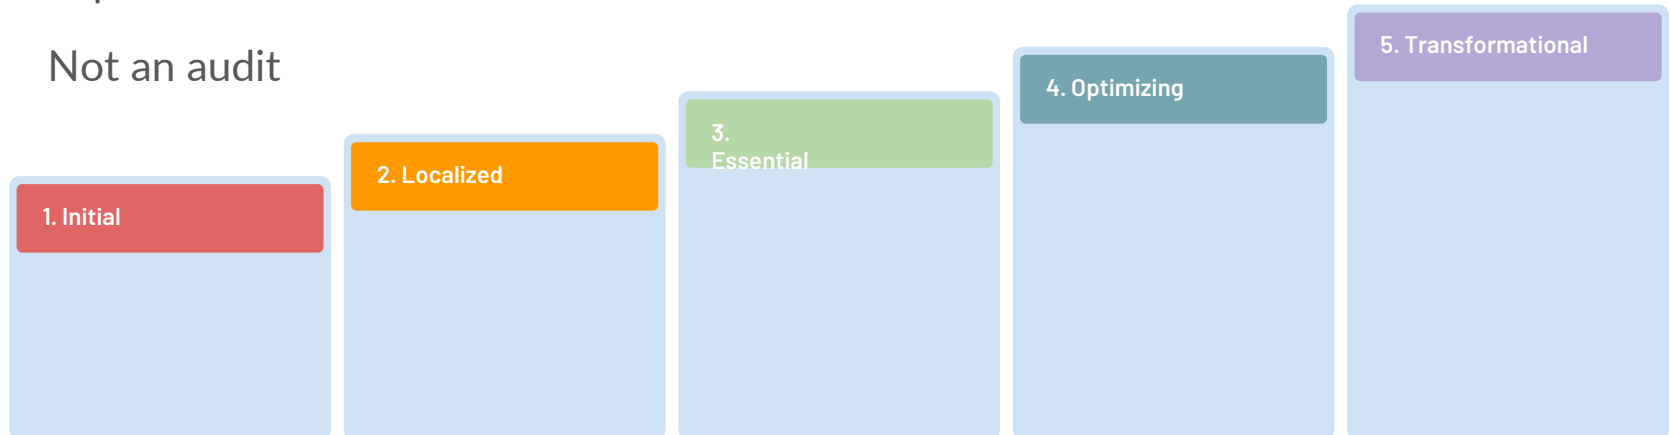

# RIM Maturity

A quality improvement tool

Examine current information practices

What are you doing well / what do you need to improve

Not an audit

# **Sample RIM Maturity Questions**

## RIM Processes

Select one.

- 1 Ad-hoc, undocumented
  - 2 Some are documented but localized
  - 3 Documented for the organization and adopted
  - 4 Are monitored and audited
  - 5 Continued improvements and automation
-

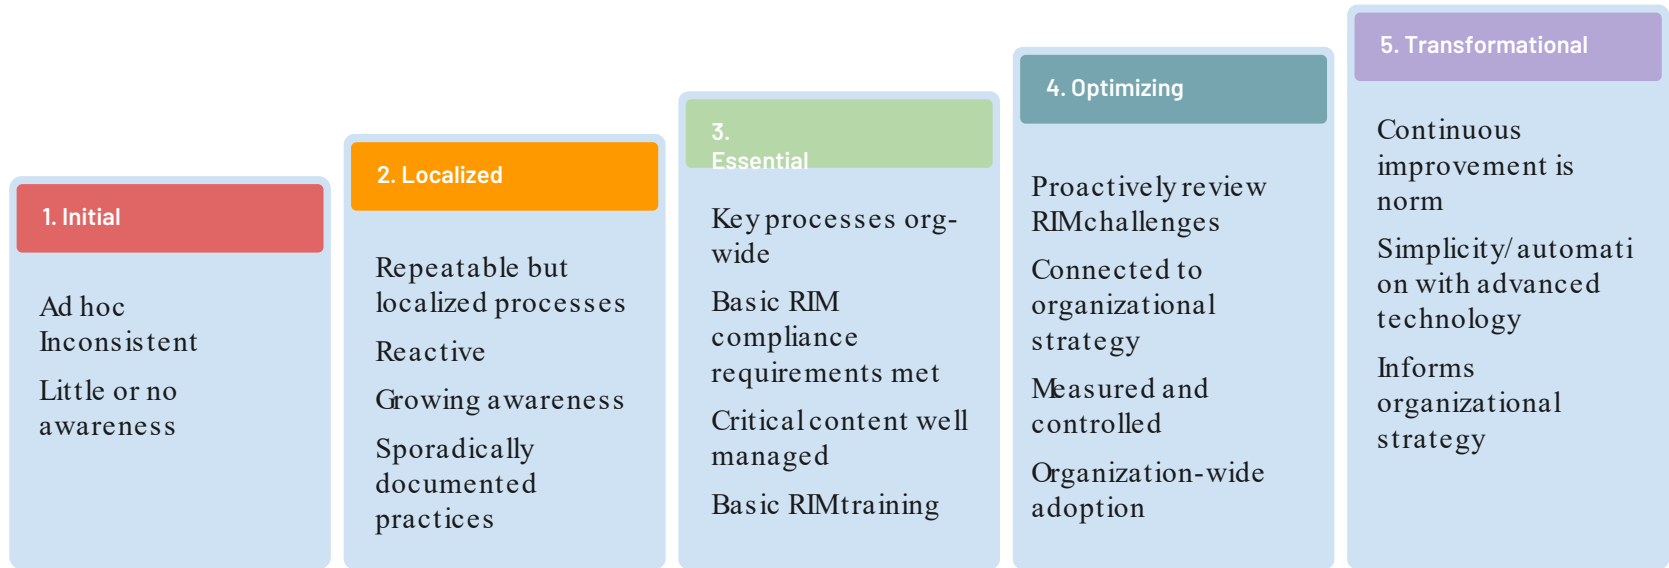

## Information Access

Select one.

- 1 Critical information is commingled with information of little value
  - 2 Critical information is organized
  - 3 Critical information is easy to find with right access
  - 4 All type of information is easy to find with right access
  - 5 Information you need is readily available when you need it, minimum search
-

# RIM Maturity

# Creating a RIM Maturity Assessment for your University Department

Use survey or forms tool

Make it 15 min or less to complete

Can Combine with interviews

Identify roles/teams to complete the assessment

## ARMA International

### Information Governance Maturity Model

LEVEL 3 (Commit)	LEVEL 4 (Provision)	LEVEL 5 (Transformation)
<p>The organization defines information compliance and requirements.</p> <p>Information compliance is captured in a multi-level, continuously crafted set of documents with information governance as a central theme.</p> <p>The organization has a clear framework context that is integrated with its overall business strategy and vision.</p> <p>All employees receive training about the importance of information governance and its impact on business and on compliance, both at any training occasion.</p> <p>Information governance is part of its mission and its verifiable goals.</p> <p>The information governance is integrated on the organization's internal and external communication and is generally effective.</p> <p>The organization is continuously pro-actively engaged in the organization's operations to achieve compliance from near the start.</p> <p>The ongoing management and innovation generation practice is integral.</p>	<p>The organization has implemented processes to capture, protect, and disclose information assets in a timely, effective manner.</p> <p>Information compliance is realized with minimal waste, with the importance of compliance and its consequences clearly understood.</p> <p>Information governance, documented learning about the importance of compliance with information management and information governance, is an integral part of the organization's training and overall education to position for future business success.</p> <p>Information governance is continuously being reviewed to adjust to changing business needs and to ensure compliance with applicable laws and regulations.</p> <p>Information governance is well integrated and effective, with defined roles and responsibilities, and with the organization's information governance practices.</p> <p>Information governance is an integral part of the organization's overall information governance practices.</p> <p>Information governance is an integral part of the organization's information governance practices.</p>	<p>The importance of compliance in the management of information assets is clearly recognized at the Board and senior management levels.</p> <p>Information governance is an integral part of the organization's training and overall education to position for future business success.</p> <p>The roles and processes for information management and information governance are clearly defined and integrated.</p> <p>All employees receive training, documented training regarding the importance of information governance, information management policies and processes, compliance with training to achieve compliance with applicable laws and regulations.</p> <p>The organization culture is so that all employees understand the importance of information governance and its impact on business and on compliance, both at any training occasion.</p> <p>The organization pro-actively is engaged in the organization's operations to achieve compliance from near the start.</p> <p>The ongoing management and innovation generation practice is integral.</p>
<p>There is a broad picture of how and how information assets are used, protected, and made available.</p> <p>Compliance is achieved through information governance.</p>	<p>Information governance policies have clearly documented roles, responsibilities, and other details.</p> <p>All employees are continuously trained regarding training to achieve compliance with applicable laws and regulations.</p>	<p>The senior management and board members consider it a top priority to ensure compliance with applicable laws and regulations and to ensure information governance.</p>

# RIM Maturity Assessment Score

Example

Need to change image

Area	1. Initial	2. Localized	3. Essential	5. Optimizing	6. Transformational
Information access & sharing			3.1		
Single Source of Truth		2.5			
Format		2.8			
Content lifecycle	1.5				
Training & support	1.5				
Compliance		2.3			
Process		2.6			
Technology	1.7				
Accountability		2.1			
RIM Program	1.7				
RIM Strategy		2.0			

Overall score: 2 – Localized

# Key Points

## RIM Maturity

Create a RIM Maturity to assess where your RIM program is today

Understand different units may be at different RIM maturity level

And identify where to take the RIM program in 3 or 5 years

Keep the assessment simple

Combine with interviews

# Part 4. Discussion

20 minutes

# Group Discussion

15 minutes

What is one takeaway so far?

What will you do differently this year?

# Next

20 minutes

Submit a question to  
presenters - 5 min

Break - 15 min

# Part 5. Follow Up

20 minutes

# **Part 6. Getting to Information Governance**

## **MANAGEMENT**

Tactics

Operationalize policies

Execution

## **GOVERNANCE**

Strategy

High-level planning

Policy

## **RECORDS MANAGEMENT**

Tactical execution of said  
planning, policy and coordination

Primary focus on compliance

## **INFORMATION GOVERNANCE**

Strategy, policy, and cross-  
disciplinary coordination of  
information

Mitigate risks

**Information governance** is the overarching and coordinating strategy for all organizational information.

It establishes the authorities, supports, processes, capabilities, structures, and infrastructure to enable information to be a useful asset and reduced liability to an organization, based on that organization's specific business requirements and risk tolerance.

ARMA Guide to the Information Profession

## 5 Signals You Need Information Governance

1. Siloed approach to information and data management
2. Focus on information compliance only, productivity or business value ignored
3. No ROI for information-related investments (tools, human resources)
4. No connection to strategy / no strategic approach
5. Decision-making based on hunch rather than evidence-based (data-driven)

# Where Do I Start?

Your team can initiate IG!

Relationship building

Identify common challenges and goals

Pay attention to Board and leadership's information challenges

Create a business case for IG - use RIM projects to show the value

Document successes - "It used to take 45 minutes to find something, now it only takes 15 minutes"

Senior sponsorship

Come together and create a IG Framework and roadmap

# IG Policy Framework

To establish goals, requirements and accountabilities of information throughout its lifecycle

- Roles and accountabilities (interdisciplinary)
- Benefits of IG
- Goals and outcomes of IG
- Alignment to the University strategy

## Example: IG Policy Framework elements

### Purpose

For University Governance team and stakeholders to access the right information at the right time to enable the university to operate effectively and efficiently, and to meets its mission and goals.

### Goal

To have University Governance information that is:

- accessible
- useable
- reduced
- protected
- compliant

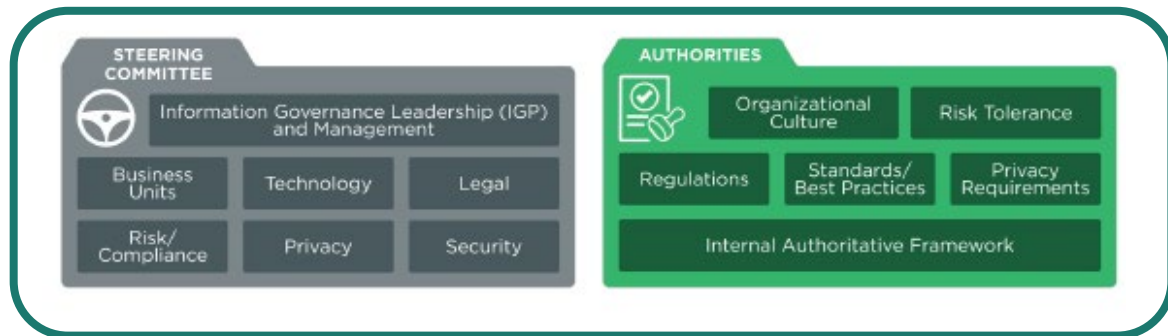

**i**NFORMATION  
**G**OVERNANCE  
BODY OF  
KNOWLEDGE  
**[iGBOK]**

ARMA INTERNATIONAL

# Information Governance Implementation Model

# Key Points

## Getting to Information Governance

1. Information Governance can be your strategic pathway for the Board and leadership to pay attention to how University Governance collects and manages information
2. You don't need \$\$ up front to start investing in IG
3. IG is an interdisciplinary approach to dealing with University records, data, etc.
4. RIM can be foundations to pursue IG
5. Don't confuse IG with RIM

# Thank you!

Ellie Kim
