

Conflict of Interest in the Research Setting

Dena McMartin, PhD, PEng, FEC

Director of Research Services and Assistant Vice President, Research

Professor, Department of Civil, Geological & Environmental Engineering

Associate Faculty, School of Environment and Sustainability

University Col Policy (excerpts)

Principles:

“to promote transparency, thereby increasing public trust in the University and the research enterprise”

“to create a culture of trust in the University and the research community”

The policy is particularly focused on questions in which a University member’s professional actions or decisions are guided or “...determined by considerations of personal gain, financial or otherwise”.

The policy also includes recognition that members “...may be involved in a conflict of interest so long as the individual has acted in good faith and in accordance...” with the policies and procedures of the University.

Standard Operating Procedures
